### Airline / Auto Adapter

Never run out of power again while traveling! This high power DC adapter is designed to power popular brands of notebook computers while in a plane or automobile. Features overload and short circuit protection. Adjusted output voltage; high efficiency and low energy consumption. CE approved. Fuse for overload protection. Small and lightweight; 13 ounces. Low ripple, low interference, and stabilized output. Free yourself from batteries while on the road! (Works with computers which require DC input from 15V to 24V.) #SS218 Airline / Auto Adapter \$49.00

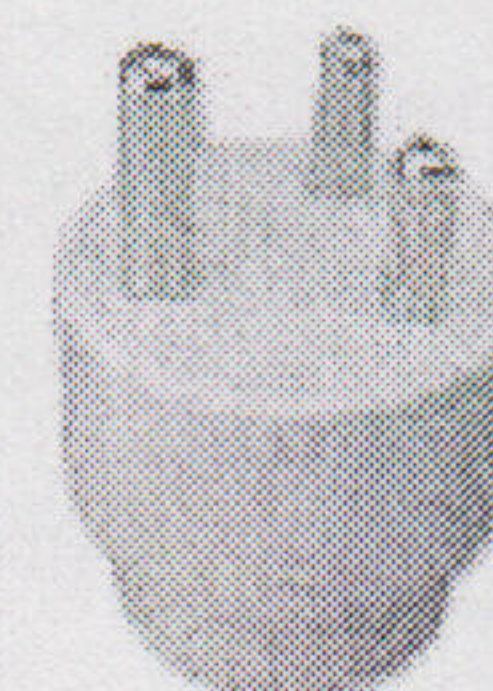

### Solar Pak

The Solar Pak connects to virtually any rechargeable electronic device; laptops, cell phones, GPS units, etc. Never be without power again while on the road. Also has a built in 4 AA NiCad or NiMH battery charger. 6V/12V switchable; built in current reverse protection. Solar panel tilts to maximize sun exposure. Includes 12V accessory plug, multi-connector DC adapter as well as battery clamps so it will connect to about any product. 21 ounces; 9.75 x 6.75 x 1.75 inches. #5998 Solar Pak \$42.50

### Updated Adapter Information

We have been working hard to upgrade our electrical and modem adapter information pages. As always, if you find an error or correction please let us know. Most of our information comes from those in the field who experience the joy of connecting internationally first hand.
