### It's our 7th Anniversary!

It all began on the tiny island country of Malta: "Discussed possibility of starting a business; appears neither Gia or I are capable of working for others. No mail-order company has the resources for serious travellers. An idea." -- Brad's Journal, March 6, 1995. We then came straight home and started up Walkabout Travel Gear with the money we had saved for our planned one-year trip.

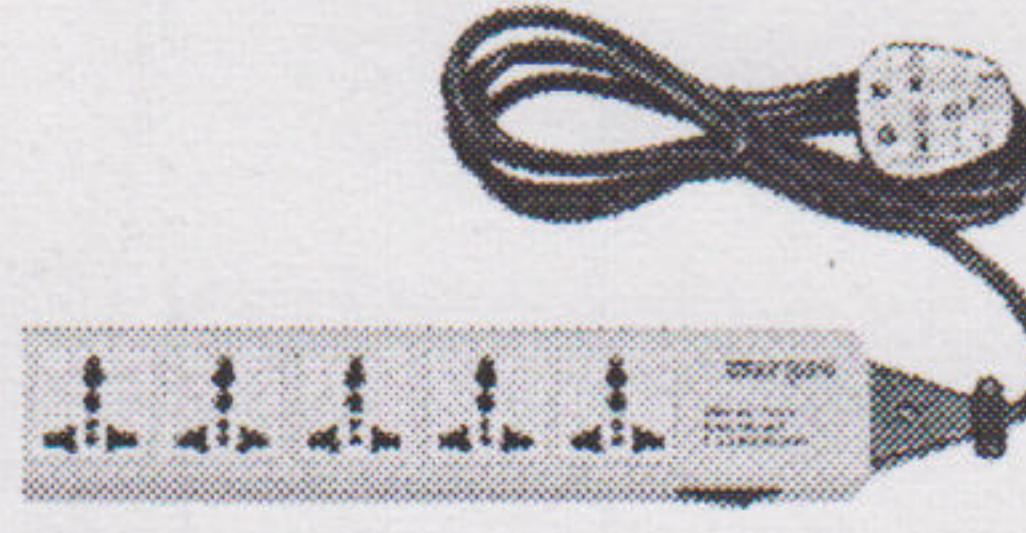

### Free Lonely Planet book with \$30 order

In celebration of our anniversary, get a free Lonely Planet book with any \$30.00 order! Just pick the book you want when you order; the cost will not automatically be subtracted from your shopping cart but will be when your order is processed. Also, all Lonely Planet books are 50% off if you need more than one.

### New Products

Our new universal 220/250V Surge Protector Strip protects your equipment while overseas. Our Universal Surge Protector offers protection in 220-250V countries. (Does not convert power; for use with dual voltage or 220V equipment, or with a transformer.) Patented universal input will accept almost any style of plug -- North American, Australian, British, Swiss, Italian, etc. CE approved. Resettable circuit breaker. Built with the UK style grounded plug, which can be adapted to any grounded style in the world with one of our grounded adapter plugs.

### Travel Health Protection

A first aid kit is an essential, but travel insurance is also highly recommended on a Walkabout of any length. We've compiled a page of various travel insurance providers with links and phone numbers. Click the link to the left to visit our Travel Insurance page.
