## Walkabout Travel Gear

### Tilley Hats -- 50% Off!

A hat is an essential travel item many travellers forget. It is both sunny and rainy out there in the world, and a good hat protects you either way. Tilley hats are widely acknowledged as the best travel hat in the world and we've tested them extensively. They won't shrink or mildew, they float, they block harmful UV-A and UV-B rays, they repel rain, and can be tied on with a tuck-away adjustable cord. Crushable and almost indestructible. (And replaced free if it ever wears out.) A nice extra feature is a hidden pocket inside the top.

### The Misadventures of Marco Solo

Misadventures from the Diaries of Marco Solo, Volume 1. The Yak Cheese Pizza Weight-Loss Program.

By Shannon Brady. In the first of a series of travel accounts by independent traveller Marco Solo and his sidekick Chameleon friend Cham, Marco begins his Walkabout in Kathmandu, Nepal. Having quit his job and left the world he knows behind, Marco Solo experiences the joys, freedom, and pain of independent travel. Now being added to our website, and available in comic form as well.

### 220V UPS System

For those who are relocating overseas with their computer, we've finally located a UPS System for 220V-240V countries. Protects your data by supplying battery backup when power fails. Microprocessor control, with LED and audible alarms. Additional features include automatic voltage regulation which corrects over and under voltages, and surge protection. Rated power 650 watts; backup 400 watts. Voltage input range: 175V-265V. CE approved.
